## Christmas Special 2011

### AT MORGANS' PASTRIES

Upon entering, you are greeted with a warm smile and clear politeness. With only a few days past opening, I was surprised to see that they had quite an assortment of pastries with different Breads, Cakes and Pies. In only a few minutes, they seem to have a definite hit with the cheezy "Rollies" as they sold out their first batch before my very eyes. Fortunately, I had eaten one before. Filled with strong flavors of pizza, it seem to deliciously linger which caused me to want more. Since they were all gone by that time, I decided to move on to the selection of different pies. Their signature pie was the "Steak & Stout gravy". All the flavors truly came through with actual chunks  eat inside and was definitely worth the price. But if you get bored with that, there's always other pies and pastries to cure that nagging pain called temptation. By Mike Gallego
